

Playback Recording in DVR

How to Playback Recording in DVR?

We can check previous recording of DVR through DVR direct interface (GUI).

- Go for **Main Menu** → **Playback** (option in Operation Tab).

- Usually there are three file types:
 - R: Regular recording file.
 - A: External alarm recording file.
 - M: Motion detection recording file

➤ Please refer to the following Section for more information.

➤ **Section 1: Display Window-**

- Here is to display the searched picture or file.
- Support 1/4/9/16-window playback.

➤ **Section 2: Calendar –**

- The Red highlighted date means there is picture or file. Otherwise, there is no picture or file.
- In any play mode, click the date you want to see, you can see the corresponding record file trace in the time bar.

➤ **Section 3: Channel Selection –**

- Select the channel for which user want to check playback. No. of channel to select may vary due to different model.
- The time bar will change once user select the channels.

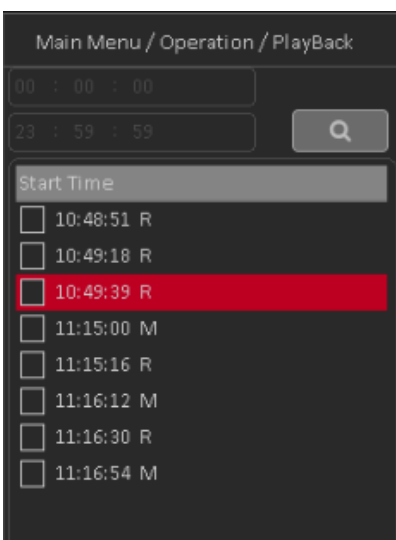

➤ **Section 4: Playback control –**

- Please refer to below sheet for more Details –

Button	Function	Button	Function
	Play/Pause		Play Backward
	Stop		Slow Playback
	Reverse Fast		Fast Playback
	Previous Frame		Next Frame
	Previous File		Next File
	Repeat Playback		Full Screen
	Start Video Clipping		End Video Clipping
	Download		

➤ **Section 5: File List –**

- The file list is to display the first channel of the record file. As seen in below image.
- Double click on file to start playback.
- User can also search the file as per selected time.

➤ **Section 6: Time Bar –**

- a. It is to display the record type and its period in current search criteria.
- b. In 4-window playback mode, there are corresponding four time bars. In other playback mode, there is only one time bar.
- c. Use the mouse to click one point of the color zone in the time bar, system begins playback.
- d. The time bar is beginning with 0 o'clock when you are setting the configuration. The time bar zooms in the period of the current playback time when you are playing the file.
- e. The green color stands for the regular record file. The red color stands for the external alarm record file. The yellow stands for the motion detect record file.

➤ **Section 7: Record type and Synchronize**

- a. In any play mode, the time bar will change once you modify the search type.
- b. While playing the file, select sync mode, system can switch to the same period of the corresponding channel to play.

➤ **Section 8: Time Bar Unit –**

- a. The option includes: 24Hr, 12Hr, 1Hr and 30Min. The smaller the unit, the larger the zoom rate. You can accurately set the time in the time bar to playback the record.
- b. The time bar is beginning with 0 o'clock when you are setting the configuration. The time bar zooms in the period of the current playback time when you are playing the file.
